THE PRIVILEGES OF AN FAA PRIVATE PILOT

First Phase Private Pilot. Part 141

Imagine soaring through the skies with total freedom! An FAA Private Pilot License, issued by the Federal Aviation Administration, gives you the wings to explore the world like few others can. Discover the privileges that make this license your gateway to adventure.

FREEDOM TO EXPLORE

With an FAA license, you can pilot U.S.-registered aircraft in America's advanced airspace—from recreational flights to epic journeys. It's also your springboard to advanced certifications, such as Private Pilot with Instrument Rating, then Commercial Pilot, and many more—with a direct transition. Other licenses may require long processes to reach these levels or to fly in global markets.

TRAINING PROCESS PART 141:

40 hours Piper PA-28 Flight with Instructor
35 hours Ground School Instruction
20 hours Aviation English Communications Lab FREE
20 hours Free Ground School Support & Guidance
10 hours Piper PA-28 Solo Flight
2 hours Piper PA-28 FAA (Checkride)
Duración: 4 months
Certificate Awarded: Private Pilot License (FAA)
Total Logbook Hours:
52 hours.

PRIVILEGES: CONQUER THE SKIES

Soar through the skies without limits! With the FAA Instrument Rating, fly through clouds and low visibility while mastering the art of instrument flight using the latest technology just like elite commercial aircraft with precision at its best.

38 hours Piper PA-28 Glass Cockpit Flight with Instructor

35 hours Ground School Classes

20 hours Aviation English Communications Lab – FREE

To Parents:

We understand that sending your child abroad is a significant decision. At Aeroservice, we provide a professional, ethical, and structured environment where your son or daughter will not only master flight training but also grow personally, with a strong emphasis on safety and responsibility.

To Students:

This is your moment. Take the first step toward an exhilarating career in aviation. Turn your passion into your profession—and know that your family can be by your side every step of the way.

Soar to new heights with Aeroservice Flight Training. Your journey begins now!

ATP CTP- TYPE RATING 737/320

We are pleased to announce a strategic partnership between AFT (FAA Part 141) and FIT (FAA Part 142), creating a comprehensive training pathway designed to develop pilots from zero flight hours to airline-level training.

AFT provides a structured training program approved by the FAA under Part 141, ensuring strong academic standards and an efficient path for professional pilot development. FIT, as an institution certified under Part 142, complements this training by offering ATP-CTP and Type Rating programs for the Boeing 737 and Airbus A320, utilizing advanced simulators and training methodologies aligned with today's airline industry.

This integration allows students to benefit from:

- Continuous training within a unified academic ecosystem
- A direct transition to airline-level training
- A real competitive advantage in the aviation job market
- Preparation under the highest regulatory and industry standards

This partnership strengthens the professional development of our students and responds to the growing global demand for highly qualified airline pilots.
